

Task 1: Data Cleaning and Preprocessing

Objective

Cleaned a raw dataset containing:

- Missing values
- Duplicate rows
- Inconsistent text formats
- Mixed date formats
- Unclean column names

Steps Performed

1. Identified missing values
2. Removed duplicate records
3. Standardized Gender values
4. Standardized Country names
5. Converted dates to a common format
6. Renamed column headers
7. Corrected data types

Files

- raw_dataset.csv
- cleaned_dataset.csv
- data_cleaning.py
- summary.txt
